Activities as President, Indo-European Education Foundation

Analytical and conceptual contributions to all components for the development of India, Poland and EU relations. Closely working with 'Embassy of India in Warsaw' Poland, Ministry of Science and Higher Education Govt. of Poland as well as Ministries from India to understand the needs of two countries and establish political dialogues towards development of trade and scientific cooperation. Supporting many Polish, Indian and European universities and training them to be the part of internationalisation of higher education. Running projects 'academia industry interlinked model of business cooperation' where academia and industries can get benefits from each-others by providing quality of education.

He is the one who has initiated an academia-industry interlinked model of business cooperation for Poland and India which has increased the well qualified Indian students at Polish universities up to 6000 in 2019, compared to 227 in 2014 as total Indian students at Polish Universities, and helped many public and private universities in Poland (EU and non-EU countries) for their survival and enhancement of quality education, specially when they were facing challenges of demographic impact. Recently, he has coordinated a project for "Warsaw Stock Exchange" dedicated to 'GPW Growth Project' as a consultant (ABSInstitute, 2019).

Projects:

Dr Kumar completed Institutional Projects (National and International)

- **Indo-Polish academic exchange project:** Dr Kumar has initiated a cooperation between Poland and India by establishing the Indo-European Centre at Vistula University, Warsaw, Poland. Project was accepted and funded by Vistula University, Warsaw, Poland. It was an international platform initiating academic cooperation with Vistula University with Indian Universities.
- **Business Risk in Changing Dynamics of Global Village (BRCDGV):** Initiated an international project BRCDGV as an international conference platform launched in 2017. The objective of this project is to provide the most effective & efficient platform for business development and academic collaborations with solutions for sustainable growth. By leveraging the talents and know-how of its people, combined with industry leading technology, I am providing support to the universities throughout Poland, India and Europe, enhancing academia-industry satisfaction, improving efficiencies, ensuring duties & responsibilities for companies and academic institutions, and improve their quality business models by providing an international platform of BRCDGV.
- **Destination India:** The objective of this project was to improve the soft power of India with a focus on the neighbouring countries and use it as tool in diplomacy; boost the number of in-bound international students in India; double India's market of global education, exports from less than 1 percent to 2 percent; increase in contribution of international students in the form of direct spends, indirect spends, spill-over effects; improve overall quality of higher education; increases in global ranking of India as an educational destination.
- **Execution of Village projects under Panchayati Raj:** By accessing the policies and plans executed by the government of Bihar for the Gram Panchayat; conduct workshops for the administrative officers as well as Panchayat Council's members; deliver a series of lectures connected with policies and executions.
- **CET-India Test:** CET-India is the abbreviation for Common Entrance Test - India. Analysing that in Poland there are no eligibility tests for foreign students seeking higher education in Poland, specially with private universities. Therefore I've launched a platform as "CET-India Test" to check eligibility for International students before they get admitted to the IIEEF's partner universities under bachelor, master and doctoral programs. The test is compulsory for all students planning to join IIEEF's Partner universities in Poland, EU and non-EU countries for higher education abroad coming from India, Nepal, SriLanka, Bangladesh, Maldives, Bhutan, and UAE. It has been accepted by many Universities in Poland, and Ukraine.
